Finances communales :
divergences régionales et tendances d’évolution ?

Arnaud Dessoy et Webster Rombouts *

* Analystes au service Research – Finances locales et fédérales de Dexia Banque Belgique
ABSTRACT

Since a couple of years the municipalities are facing a series of important developments of the framework conditions in which they have to operate. These developments and shifts are not without consequences for their budgets. It is in this context that Dexia Bank has carried out a detailed analysis of the finances of the municipalities. This assessment represents a photography of the situation of the Belgian municipalities and highlights diverging and converging developments in their receipts and expenditures.

KEYWORDS: finances of local authorities, public finance
